CASE STUDY: San Francisco Giants Main Stadium

Before Treatment

After treatment with MicroGuard[®] AD703

Situation: Memorial Blocks at the San Francisco Giants main stadium entrance had turned black and were very difficult to read, clean and maintain.

Solution: Treated with MicroGuard[®] AD702 Sealer and AD703 Concrete & Tile Treatment.

Results: Tiles remain clean; names are easy to read; blocks are protected from degradation & discoloration and are easier to clean and maintain. Constant abrasive wear from foot traffic has not deteriorated the paver surface.
