CASE STUDY: Abbott Laboratories, Chicago, IL

Situation: This very prestigious laboratory is driven to continual upkeep and pristine maintenance of its facilities.

Solution: Relative to the tile & polymer grout floors in employee locker rooms & restrooms, Abbott Laboratories turned to Adsil's patented, inorganic, reacted MicroGuard clear tile floor treatment and to Haugland Bros., Inc., a premier MicroGuard Installer.

Results: Following installation, the hard tile provides a beautiful, gloss finish that is extraordinarily abrasion & water resistant and is UV stable. The grout is effectively sealed and stain resistant. The treated surface will now clean easily with water and neutral pH, green cleaners, thus, saving material and labor costs.
